

Áreas y perímetros de paralelogramos

		ÁREA	PERÍMETRO
CUADRADO	 <p>3,5 cm</p>	$A = l \times l = l^2$ $A = 3,5 \times 3,5 = 12,25 \text{ cm}^2$	$P = 4 \times l$ $P = 4 \times 3,5 = 14 \text{ cm}$
RECTÁNGULO	 <p>5 m 8 m</p>	$A = b \times a$ $A = 8 \times 5 = 40 \text{ m}^2$	$P = 2 \times (b + a)$ $P = 2 \times (8 + 5) = 2 \times 13 = 26 \text{ m}$
ROMBO	 <p>4 m 3 m 2,5 m</p>	$A = D \times d / 2$ $A = 4 \times 3 / 2 = 12 / 2 = 6 \text{ m}^2$	$P = 4 \times l$ $P = 4 \times 2,5 = 10 \text{ m}$
ROMBOIDE	 <p>6 hm 10 hm 5 hm</p>	$A = b \times a$ $A = 10 \times 5 = 50 \text{ hm}^2$	$P = 2 \times (b + h)$ $P = 2 \times (10 + 6) = 2 \times 16 = 32 \text{ hm}$
